

SKAO Regional Centre Australia

JOIN OUR TEAM!

WE'RE HIRING: AusSRC Support Scientist

Join the dynamic AusSRC team and be at the forefront of groundbreaking discoveries in radio astronomy!

About the role:

As part of the role, you can expect to:

- Conduct research using SKA and precursor telescopes.
- Translate science objectives into system and software requirements.
- Help to develop the SRC Network.
- Support user systems and services.
- Simulate SKA data-sets in different formats, and exercise different tools for processing data.

About you:

The ideal candidate must:

- Possess a doctorate in a relevant discipline.
- Have knowledge, background, and experience in radio interferometry.
- Be able to work as part of a diverse scientific research team.
- Possess strong motivational, organisational and communication skills.
